

## Anchor Data Systems (NI) Ltd - EPOS Roll Definition Guide:

### **Thermal Paper Rolls:**

**Thermal paper** is a special fine paper that is impregnated with a chemical that changes colour when exposed to heat. Usually the paper turns black although thermal paper is also available that can change into two different colours. It is used in thermal printers and particularly in cheap, lightweight devices such as adding machines, cash registers, and credit card terminals.

### **Impact Printer / Kitchen Printer Rolls:**

**Single or multi-ply till rolls** are used in impact or dot matrix printers and you'll know if your registers use impact printers because you'll see that it uses a ribbon. You can then choose a single or multi-ply till roll depending on the number of copies your business needs of your receipts. Unlike Thermal Printers, Impact Printers typically use A-Grade paper.
