Need a compact, powerful small-footprint display with full-color graphics?

YES

NCR RealPOS 6.5" LCD Display complements your total point-of-service solution

This display is built with a small footprint and ergonomic packaging to maximize space. The crisp, clear screen is designed to be easy to see and read, and is perfect as either an operator or customer information display. Unlike 2x20s or smaller operator displays, this user-friendly LCD is simpler for associates to navigate, enabling more customer focus than smaller, less-readable displays.

- **Keeps your customers informed**

Making it simple for your customers to see pricing, promotions and other items of interest, this full-color LCD display enhances your communications and provides greater customer satisfaction. The NCR RealPOS 6.5" LCD display offers a vivid way to get your message to your customers!

- **Fits well into almost any retail environment**

Multiple mounting options make this a very flexible solution for any retailer. With the ability to connect to the NCR RealPOS 64-Key keyboard, it's a perfect fit as a compact operator display. Mounting options are also available as a customer display on the NCR RealPOS 70 and 70xrt.

- **Designed for retail**

Certified with NCR RealPOS workstations to ensure a stable platform and eliminate potential conflicts, the NCR RealPOS 6.5" LCD Display supports both OPOS and JavaPOS drivers to simplify application integration and minimize ongoing support costs.
